PROFESSIONAL SUMMARY

Full Stack Java Developer and Data Analyst with hands-on experience building REST API-based microservices, responsive web applications, and data-driven models. Skilled in Java, Spring Boot, Hibernate, React, Docker, Git, Jira, and Agile Scrum delivery. Proven ability to design scalable, secure, role-based systems, backed by strong SQL, Python, and machine learning fundamentals. Effective collaborator with corporate behavioral training in team communication and cross-functional coordination.

SKILLS

Languages:	Java, Python, R, SQL, Scala, HTML, CSS, JavaScript
Frameworks/Libraries:	Spring Boot (MVC, Security, JWT), Hibernate, React, NumPy, Scikit-Learn, Pandas
Tools/Platforms:	Docker, Git, Jira, Maven, MySQL Workbench, PostgreSQL, Excel, Tableau, Jupyter Notebook, REST APIs, Microservices Architecture
Methodologies:	Agile/Scrum, Sprint Planning, Version Control Workflows, CI/CD Fundamentals
Soft Skills:	Problem-Solving, Team Collaboration, Adaptability, Attention to Detail, Quick Learning, Professional Communication

WORK EXPERIENCE

Cognizant – Program Analyst Trainee (Intern)

Jan 2026 – May 2026

Full Stack Java Engineering Track | Coimbatore, India

- Completed a 4-month Full Stack Java Engineer training program covering Spring Boot, Hibernate, REST API design, and microservices architecture.
- Practiced Git-based version control across a 6-member Agile team, managing branching strategies and peer code reviews over 4 sprint cycles.
- Tracked 4 Agile sprints in Jira, managing backlog items and task assignments throughout the training cycle.
- Containerized 8 backend microservices using Docker to maintain consistent development and deployment environments.
- Collaborated with 6 engineers on an Agile team delivering the CityCare healthcare platform, joining daily stand-ups and sprint retrospectives.
- Rounded out the 4-month onboarding program with corporate behavioral training in professional communication and cross-functional teamwork.

PROJECTS

CityCare – Healthcare & Emergency Medical Response System

Feb 2026 – Apr 2026

Cognizant Internship Project

- Engineered a full-stack municipal healthcare and emergency-response platform spanning 8 modules: Identity & Access, Citizen Management, Facility & Staff, Patient Records, Emergency Dispatch, Compliance, Reporting, and Notifications.
- Built REST API-based microservices using Java, Spring Boot (MVC, Security, JWT), and Hibernate ORM against a relational database (MySQL/PostgreSQL).
- Developed responsive front-end dashboards for 6 distinct user roles (Citizen, Doctor/Nurse, Dispatcher, Hospital Admin, City Health Officer, Compliance Officer) using React.
- Implemented role-based access control and immutable audit logging to satisfy security and compliance requirements.
- Delivered the platform across 4 Agile sprints (15 days each) within a 6-member team, using Jira for sprint tracking and Docker for containerized deployment.

Dev-Hub – Java Full Stack Application

Jun 2025 – Jul 2025

- Developed a full-stack web application to streamline user interaction and centralize data management for end users.
- Architected the backend with Java, Spring Boot, and MySQL.
- Paired with a responsive front-end built in HTML, CSS, and JavaScript.
- Integrated JWT-based authentication, optimized database queries with Hibernate, and automated builds with Maven.

Bitcoin Trading Prediction

Sep 2024 – Jan 2025

- Designed a Bitcoin price prediction model using historical market data.
- Preprocessed and explored the dataset with NumPy and Pandas.
- Implemented Linear Regression using Scikit-Learn.
- Visualized results with Matplotlib and improved model accuracy through iterative feature engineering.

HR Data Analysis

Jun 2024 – Jul 2024

- Wrote SQL queries against HR datasets in Oracle Database to extract, clean, and analyze employee records.
- Applied advanced SQL functions for data retrieval and analysis on core database operations.

SUMMER TRAINING

Board Infinity – Data Analyst

Jun 2024 – Jul 2024

- Mastered DBMS concepts including ER diagram design, normalization (1NF–3NF), and B/B+ Tree indexing for query optimization.
- Gained expertise in transaction management, covering ACID properties, serializability, and concurrency control.
- Practiced SQL (DDL, DML, DCL, TCL) including joins, sub-queries, GROUP BY, HAVING, and CASE statements.
- Created data models in MySQL and compared SQL vs. NoSQL systems to optimize database structures for actionable insights.

CERTIFICATIONS

- Principles of Gen AI – Spring Board (Jun 2025).
- Cloud Computing – NPTEL (Oct 2024).
- Data Visualization and Data Analysis – Coursera (Dec 2024).
- Supervised Machine Learning: Regression and Classification – Coursera (Oct 2024).
- Data Analysis – Board Infinity (Oct 2024).
- Excel Skills for Data Analytics and Visualization – Coursera (Apr 2024).

ACHIEVEMENTS

- Competed in the Code-a-Haunt coding competition (codingblocks.com).
- Attended a Data Science Workshop (cbgo.live).

EDUCATION

Lovely Professional University – B.Tech, Computer Science and Engineering

Phagwara, Punjab | Aug 2022 – Jul 2026 | CGPA: 8.24

DKNP Junior College – Intermediate, MPC

Vissannapeta, Andhra Pradesh | Jun 2020 – Mar 2022 | Percentage: 96%

Sri Siddhartha Educational Institutions – Matriculation

Vissannapeta, Andhra Pradesh | Jun 2019 – Mar 2020 | Percentage: 97%
